

# Got a place for a BARN BUDDY?

## ***Employment Perks:***

***Environmentally safe solutions to the mice or barn vermin problem.***

***Feline buddy for your goat, cow or horse.***

Please consider giving a home to one or more PAWS barn cats. We recommend two or more cats because they need company, but of course, one cat would also appreciate a home. Cats in groups can alert each other to dangers from approaching predators such as, foxes, coyotes or free-roaming dogs.

**Occasionally, PAWS has cats who are:**

- 1) Vaccinated, including rabies vaccinations**
- 2) Spayed/neutered**
- 3) Tested for FLV and FIV negative (Hey, that is good!)**
- 4) Vet-checked**
- 5) Treated for fleas / ticks.**

**but they WANT TO BE RAISED IN A BARN!**

**IF you have such a haven for low-maintenance “cat-employee” or “barn buddy”, please let us know. Please call 252.642.7297**
